P & P  
 SUBJECT: COMMENTS RE IG REPORT

13 February 1956

130256

The following are keyed against your paragraphs:

6. I believe that test sampling of the [REDACTED] package station would be a good idea. I don't believe, however, that one test should be controlling but that a series of tests would be useful in determining whether the package stations have been properly constituted. 25X1A6a

6. f. The building of a major wartime base to service [REDACTED] war-time requirements does not seem justifiable at this time. I will deal with this further with respect to the [REDACTED] station. 25X1A 25X1A6a

6. g. I believe that the [REDACTED] equipment should be maintained for use in the Area. 25X1A6b

28. I see no reason why establishment of a recreational club [REDACTED] is not a good idea provided that the personnel in that Area so desire it. 25X1A6a  
 25X1A9a Talking with [REDACTED], he is of the belief that they would support it if they did not have to make an initial monetary contribution.

32. If the additional space [REDACTED] is for the radio station, I believe this is wrong, and I am becoming more firmly convinced with each additional discussion on the subject that the radio station should either be moved out [REDACTED] entirely or given a location [REDACTED] which will provide sufficient space for decent antennas and some hope of a reduction in interference. This obviously would not be within the confines of [REDACTED] 25X1A6a 25X1C4a  
 25X1C4 [REDACTED] It seems to me that if a small peacetime base station--say [REDACTED] could be located either at the [REDACTED] site or at some site to be selected, this would be a better solution and also provide the first unit of a wartime base station. 25X1A6b

35. Assuming that such an agreement can be justified in terms of the service performed, I see no objection to this action. However, is this something which is costing us personnel to accomplish or is it something which can be done and makes more profitable the use of existing personnel?

38. I don't quite understand this since I believe the various Areas are reducing their excess inventories as rapidly as they can. If we were not so short of personnel already it would be O.K., but since this is obsolete and excess equipment I don't quite understand the high priority accorded this idea.
